

**DESKTOP AUTHORITY
IMAGE CENTER™**

Desktop Authority Image Center 22nd June 07 Hardware Support Update

This update enables Desktop Authority Image Center to capture and deploy images on the latest desktop, notebook and server computers. Please note that this is the second hardware support update released in June.

How to install the 22nd June 2007 Hardware Support Update for Desktop Authority Image Center:

1. Download the "22 June 07 Hardware Update - Bootable Media" zip file
2. Extract ramdisk.dat and kernel.dat files into:

C:\Program Files\ScriptLogic Corporation\
DesktopAuthorityImageCenter\ManagementConsole\OSDDemon

3. Create new bootable media from the DA Image Center console
4. Download the "22 June 07 Hardware Update - Master Image Creator" zip file
5. Extract ramdisk.dat and kernel.dat files into :

C:\Program Files\ScriptLogic Corporation\
DesktopAuthorityImageCenter\ManagementConsole\ImageCreator

6. Using "Configure PXE Server" in the DA Image Center console, remove the "Desktop Authority Image Center Agent" and "Master Image Creator" components from all existing PXE servers. Then upload both components again to all PXE Servers.
